

The purpose of this information is to empower lovers of the breed with more knowledge to help them make breeding decisions that will be in the best interest of their own dogs, as well as of breed at large. It is by courageously and honestly sharing information with each other that we can preserve the past and protect the future. Please be sure to thank the breeders and owners of affected and known carrier dogs for being willing to make this information public.

Name	Status	Sire	Dam	Eye checked before 7 wks by ACVO ophthalmologist?	Diagnosed with CH/CEA before 7 wks by ACVO ophthalmologist?	Diagnosed with CH/CEA after 7 wks by ACVO ophthalmologist?	If yes, CEA or CH?	Inaccurately DNA tested as normal?	If yes, by what company or lab?

Status Legend	
Affected ¹	(confirmed by eye exam)
Affected ²	(has both an affected sire & dam)
Carrier or Unknown Affected? ³	(has produced affected offspring & was NOT eye checked before 7 wks)
Possible Carrier or Unknown Affected? ⁴	(had affected littermate & was NOT eye checked before 7 wks)
Possible Carrier ⁵	(has affected littermate & was eye checked normal before 7 wks)
Carrier ⁶	(has affected sire or dam & was eye checked normal before 7 wks)
Carrier ⁷	(has produced affected offspring & was eye checked normal before 7 wks)
Unknown ⁸	(all other dogs whose status is otherwise unknown, including eye checked normal dogs, not eye checked until after 7 weeks)
Confirmed not Affected ⁹	(eye checked clear before 7 weeks, but these dogs may still be carriers.)
Test Bred Potentially Clear ¹⁰	(nonaffected dog test bred to an affected dog and did not produce affected puppies, which indicates that the dog is potentially not a carrier)
There is no NORMAL category, because currently there is no way to conclusively confirm that a dog is not a carrier, by DNA or any other means.	
Additional dogs may be submitted by permission of owners or breeders with information verification.
